## **DETAILED ACTION**

### ***Response to Amendment***

In view of Applicant's amendment to the specification, the objection to the specification is withdrawn.

In view of Applicant's arguments and the amendment to the claims, the rejections of claims under 35 U.S.C. 112 second paragraph, as being indefinite, are withdrawn.

Further, with respect to claim 51, the prior art, either singly or in combination, fails to anticipate or render obvious, the method, including the limitations of after said step (d), introducing an impurity in said first region in self- alignment with said element isolation region and said gate electrode so as to form a second semiconductor region and a third semiconductor region in said first semiconductor region such that said second and said third semiconductor regions have a depth shallower than that of said first semiconductor region and that of said trench, and wherein said second and said third semiconductor regions serve as said source and said drain region of said field effect transistor such that a channel forming region thereof is to be formed at the bottom surface of said trench and two side surfaces

of said such trench between said second semiconductor region and said third semiconductor region in combination with the other limitations of independent claim 51.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
